

RHB Futures QST

- Desktop Application User Guideline

RHB Futures QST – Desktop Application

Features :

- Multiple tabbed workspaces allow one or more internal frames. Frames can be pulled into external windows & support multiple monitors.
- Infinitely configurable colors, layouts and font sizes
- "Themes" functionality allows user to easily create a unified color scheme throughout all the screens of the application
- Templates for multiple frame workspaces, trading workspaces, and chart-link workspaces
- Context sensitive month selection. Type a contract, and the valid month/year pairs appear in a window. Contract selection system allows search by category, exchange, description and symbol. Simply click on the symbol to enter it.
- Contract details shows exchange, contract value, minimum tick size and value, open/close time and margin requirements

1.0 Download Google Authenticator

- Please download Google Authenticator from Apple App Store of Google Play Store as shown below
- Please refer to following slides for more details.

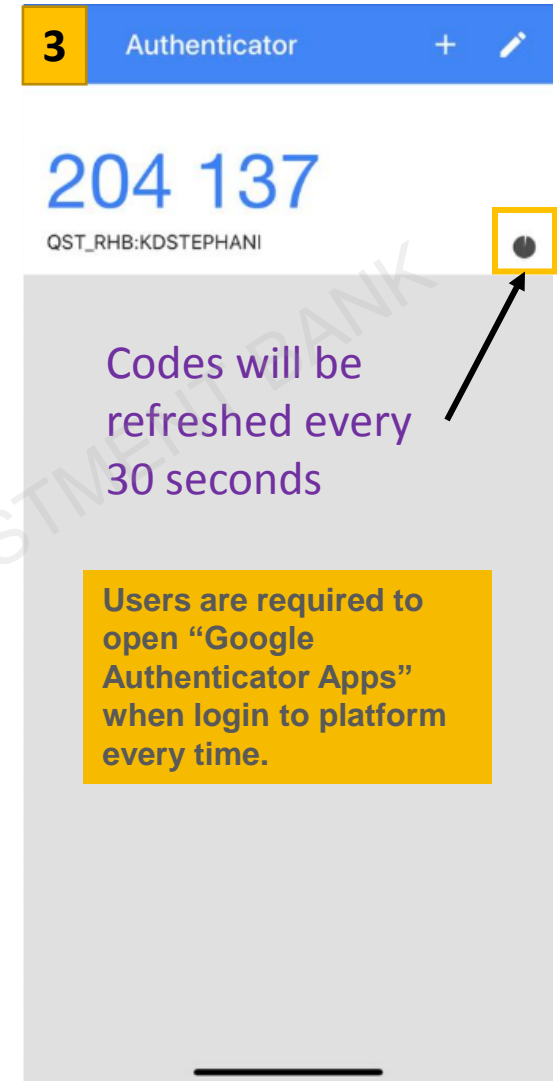

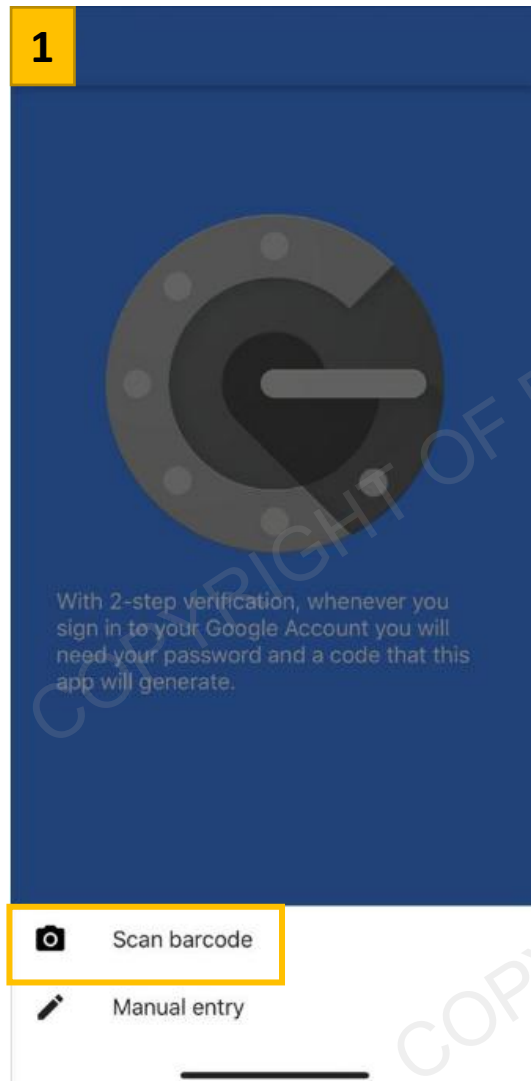

1.1 Activate 2FA (For first time user only)

The login page for RHB 2FA activation. It features the RHB logo at the top left with the tagline "TOGETHER WE PROGRESS". On the right, it says "Already have an account? [Sign In](#)". The main section is titled "2FA Activation" and contains the instruction "Please login to activate 2FA on your account." Below this are input fields for "Username" and "Password", followed by a "Submit" button. A watermark "COPYRIGHT OF RHB INVESTMENT BANK" is visible across the page.

1.2 Using Google Authenticator for Login

1.3 QST Desktop – Installation

- Go to <https://www.rhbtradesmart.com/futures-trading-platform.html> and download RHB Futures QST application
- Mac and Windows installation version are available.
- Once the application is downloaded, launch the installer and run.

The screenshot displays the RHB TRADESMART website interface. The header includes the logo, tagline "Control . Convenience . Rewards", a menu, and navigation links for Login, Sign Up now, and We're here to help. The main content area is divided into three columns. The left column features an image of a computer monitor displaying the RHB Futures QST Desktop Application. The middle column lists the system requirements: "Windows 7 or above, Mac OS Mountain Lion, Linux (Ubuntu 12.04, or Fedora 17)", "Quad Core AMD or Intel", "4GB RAM or above", and "1GB Hard disk space". The right column contains two yellow buttons labeled "For Windows" and "For Mac", each with a corresponding "Download RHB Futures QST" link. A mouse cursor is shown hovering over the "For Windows" button.

RHB Futures QST Desktop Application

Windows 7 or above, Mac OS Mountain Lion, Linux (Ubuntu 12.04, or Fedora 17)
Quad Core AMD or Intel,
4GB RAM or above,
1GB Hard disk space

1.4 QST Desktop Log In

- Launch the application after successful installation. The “Login” window will appear.
- Enter the User Name, Password, 2FA and click Login.

The image shows the QST Desktop Login window and a mobile authenticator app interface. The login window has fields for User Name, Password, Code, and Language, along with a 'Load settings from' section and 'Login', 'Settings', and 'Exit' buttons. The authenticator app shows a 6-digit code '204 137' and a refresh button.

Step 1: Enter User Name

Step 2: Enter Password

Step 3: Click “2 FA” and go to “Open Google Authenticator App”

Step 4: Insert 6 Digit verification code “204137”

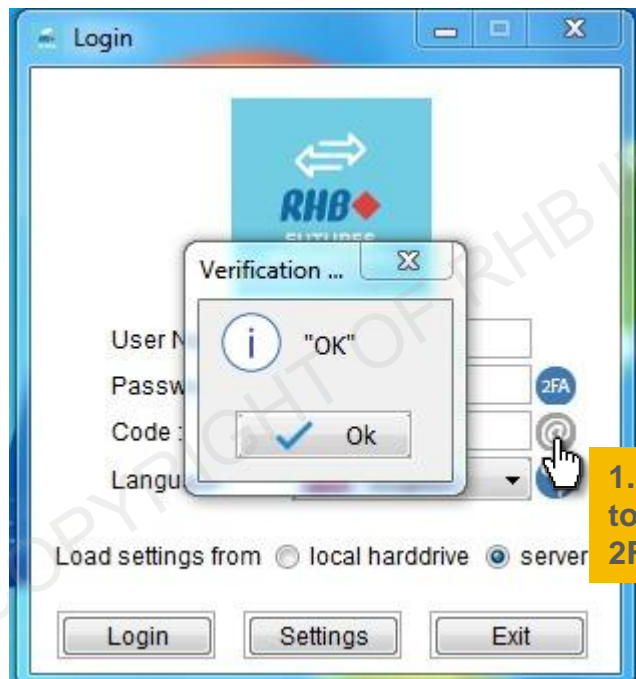

Ensure “Load settings from server” option is checked and click Login button

Step 5: Click “Login”

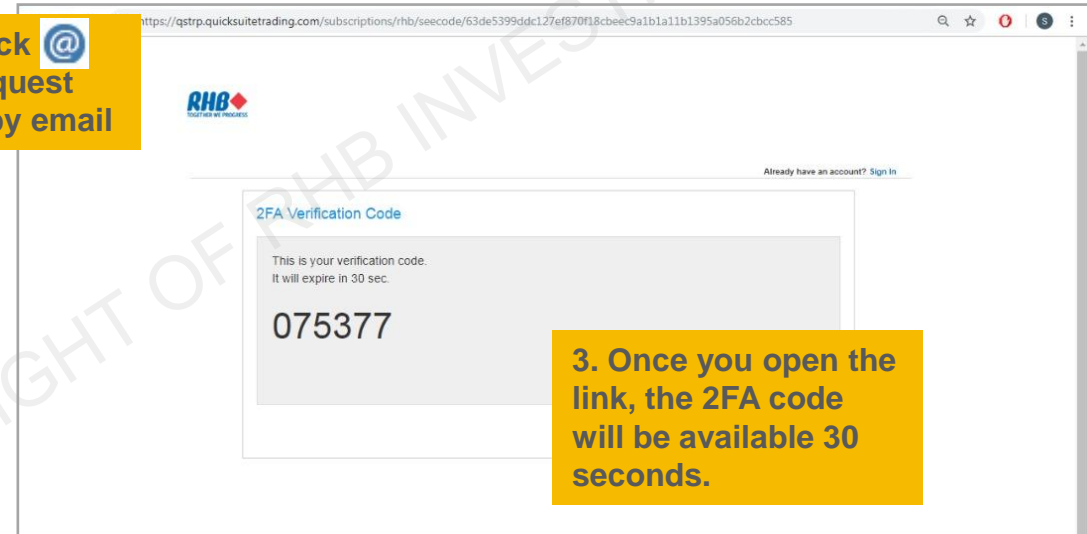

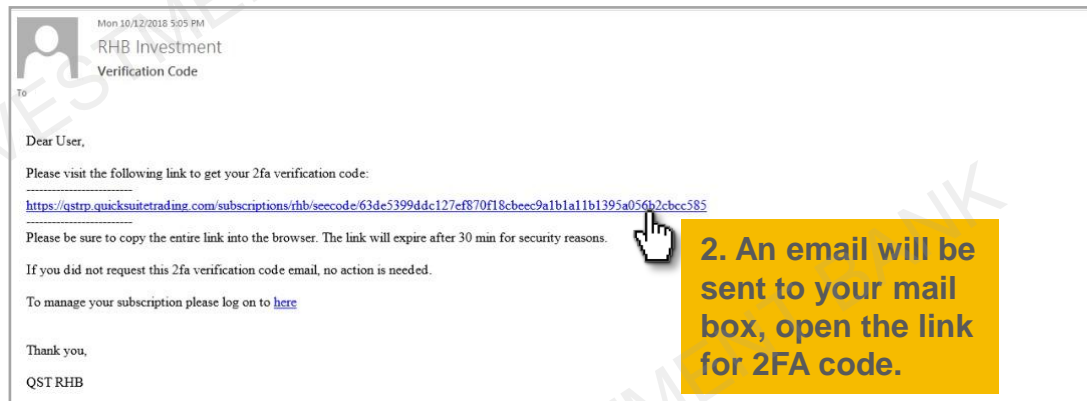

*Codes will be refreshed every 30 seconds

1.5 QST Desktop Log In – 2FA by Email

- Alternatively, user can request 2FA codes through email if smart phone or Google Authenticator apps are not working. (Follow the steps below to get 2FA by email)

1. Click @ to request 2FA by email

2.0 Overview - Main Window

Account

2.1 Overview - Toolbar Function

- Button on left “ General Toolbar” – will be permanent on the workplace
- Buttons on the right side will change according to active workplace

General toolbar

Toolbar settings following active workplace

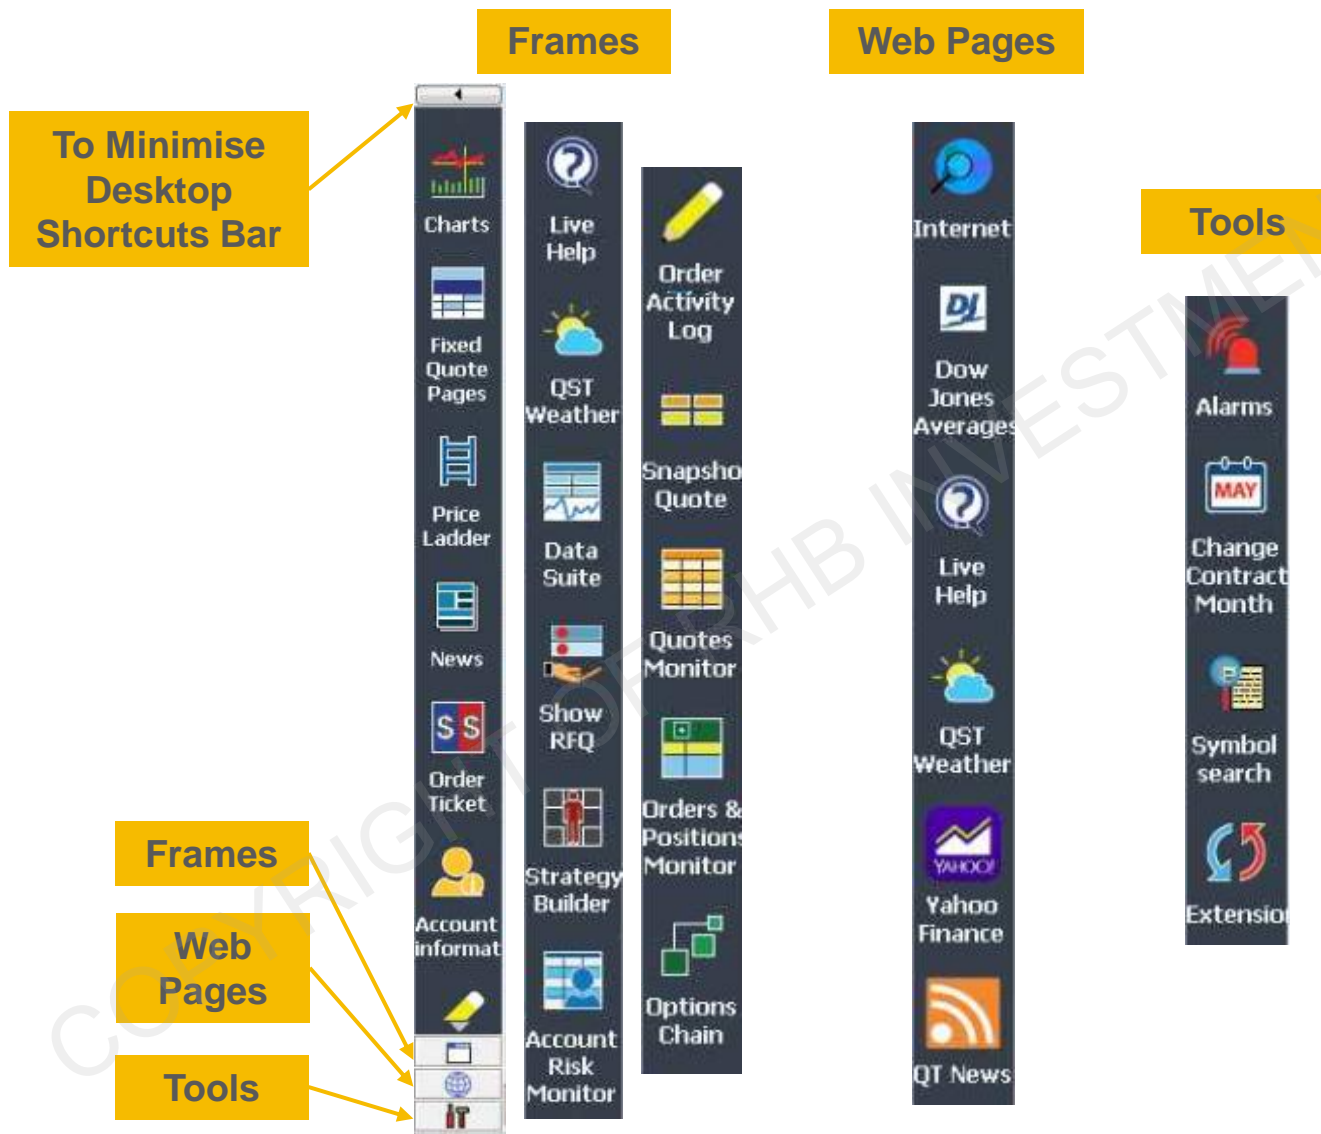

Sequence from the left:

1. Change the general (application) level properties
2. Send active desktop to printer
3. Tech Support Screenshot
4. Load backup settings from server
5. Undo the last action
6. Redo the last undone action
7. Auto arrange the frame in active workplace

Sequence from the left:

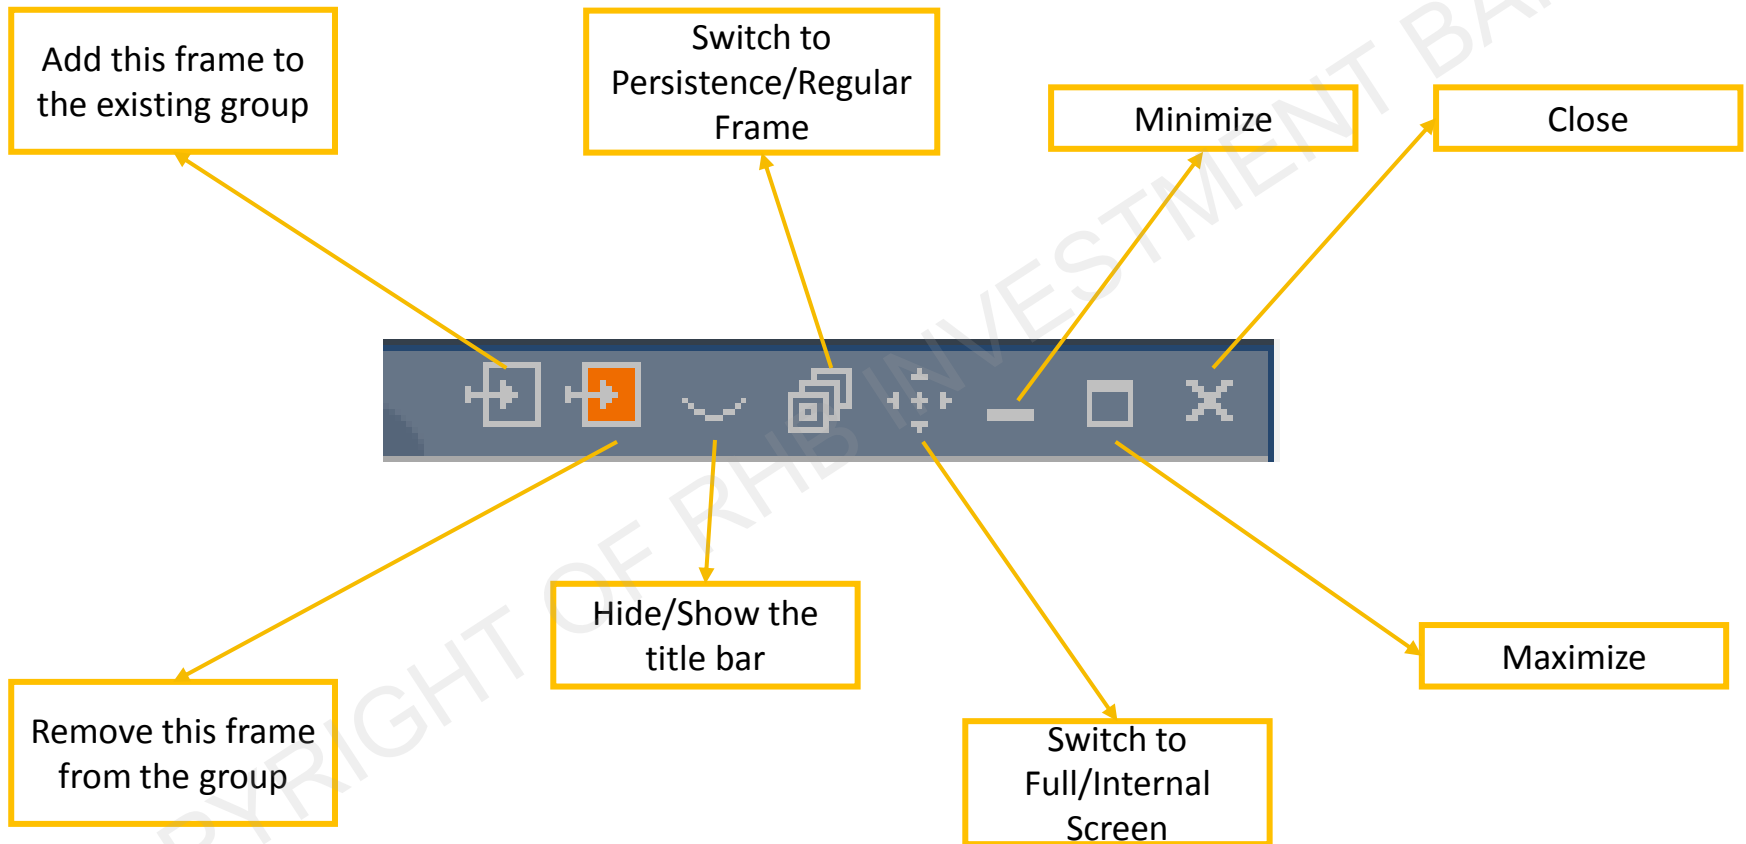

1. Insert an empty line
2. Insert a titled line
3. Remove the selected line
4. Decrease the font size
5. Increase the font size
6. Print
7. Active workplace properties
8. Active workplace help

2.2 Overview - Desktop Shortcuts Bar

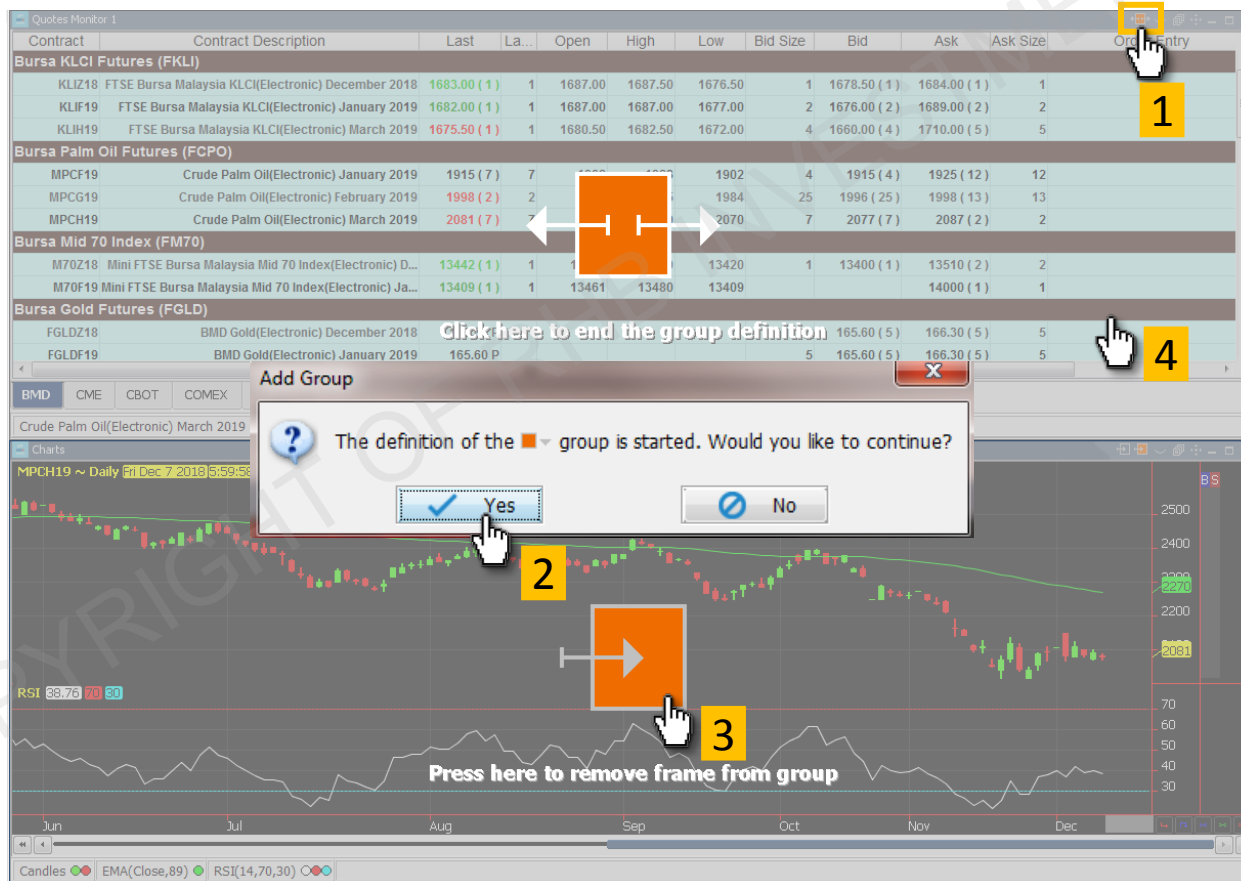

Using Desktop Shortcuts Bar to open widget in the desktop

2.3 Overview – Frame Buttons

2.4 Overview - Widget Grouping

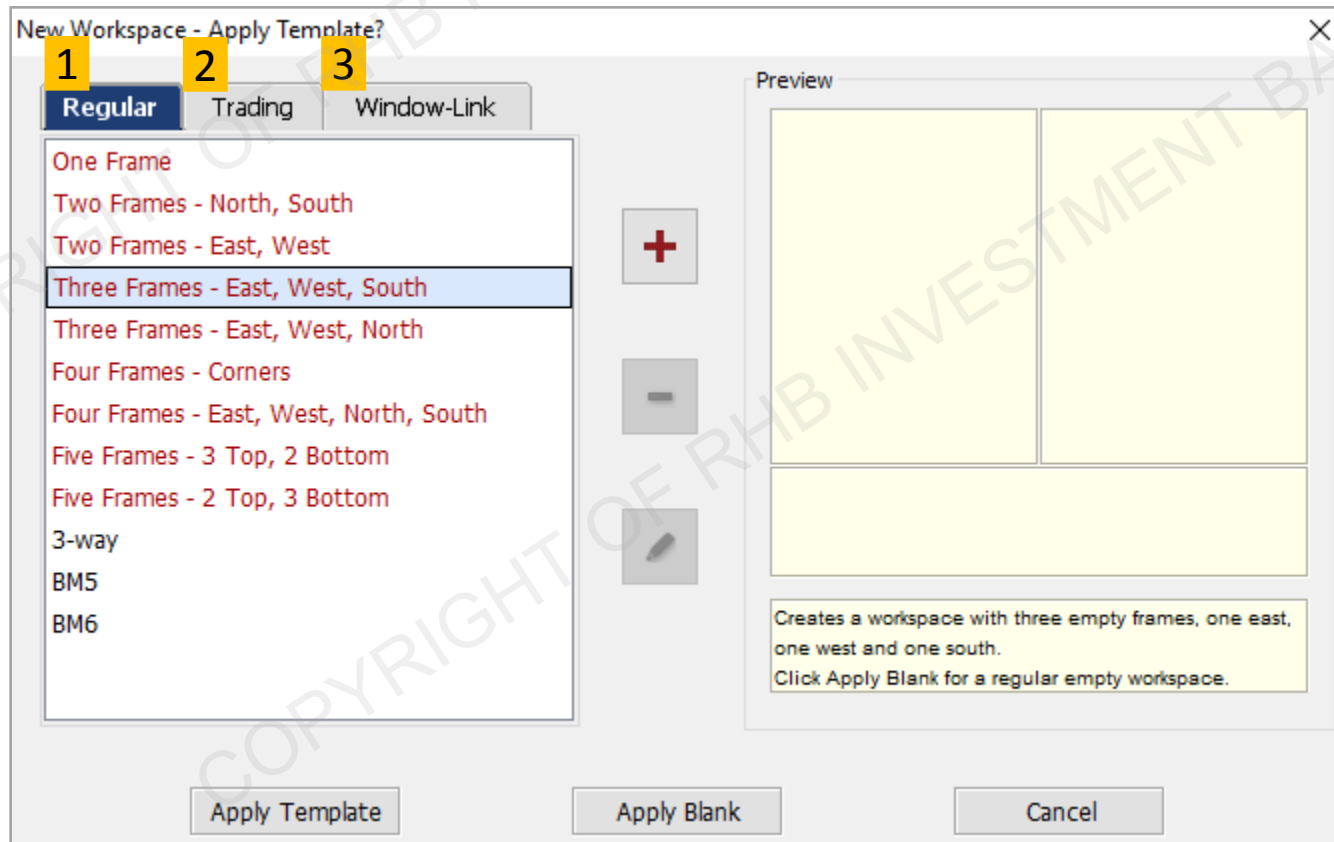

- You may synchronize widgets by grouping them using the same color in the same workplace. (Follow below step for setup)
- When you select a particular product in “Quote Monitor”, the “Charts” will be shown in the product you select.
- We have grouped “Quotes Monitor” and “Charts” for your convenience in the default layout.

2.5 Overview — Templates

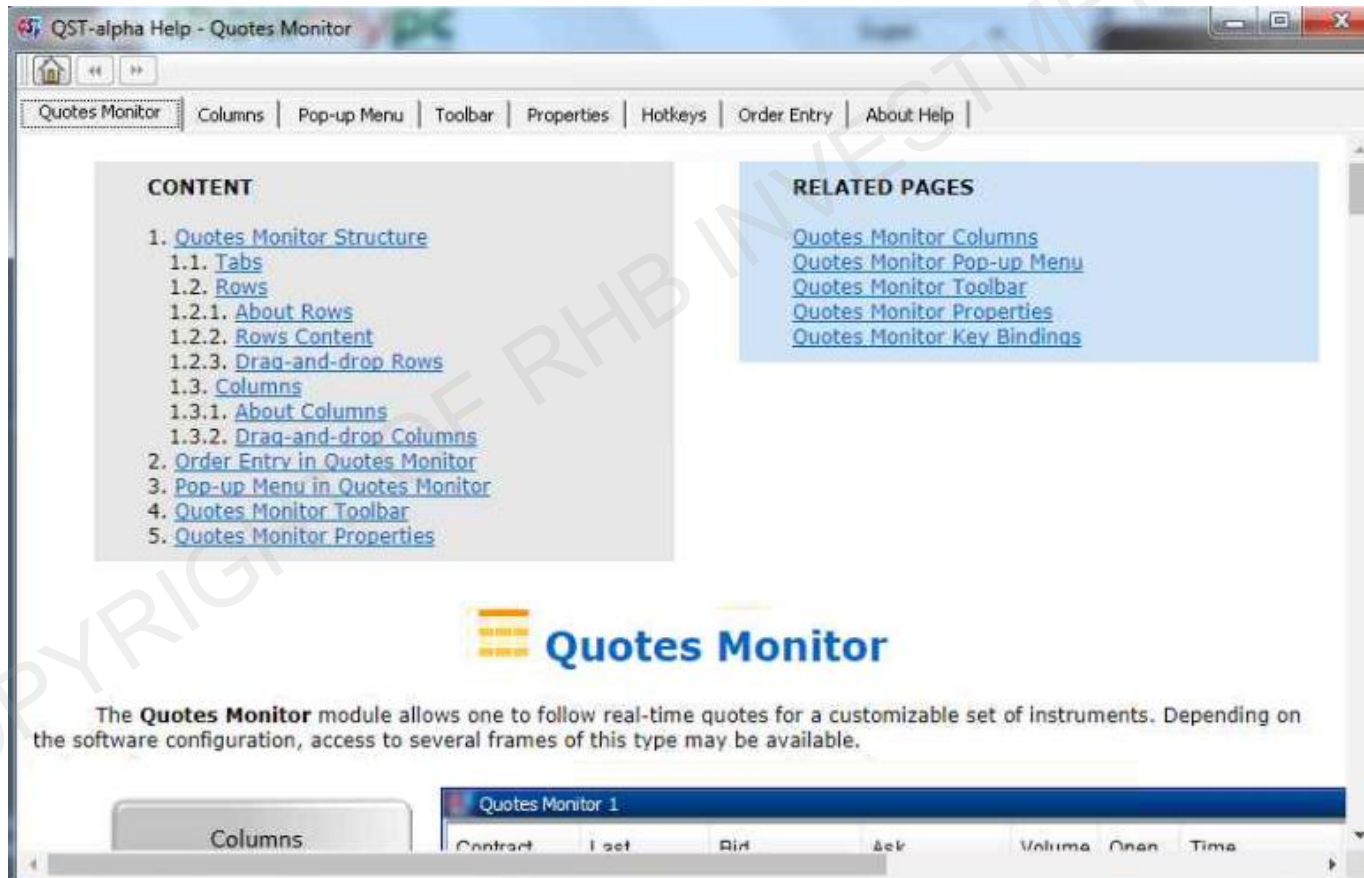

Apply a template to your workspace when you create a new workspace.

- 1 Regular template – template defines the number of frames and their location, size in a workspace.
- 2 Trading template – template where user can specify frame type, futures contract code when filling the workspace.
- 3 Window-Link template – Allow user to synchronize the data displayed between various frames.

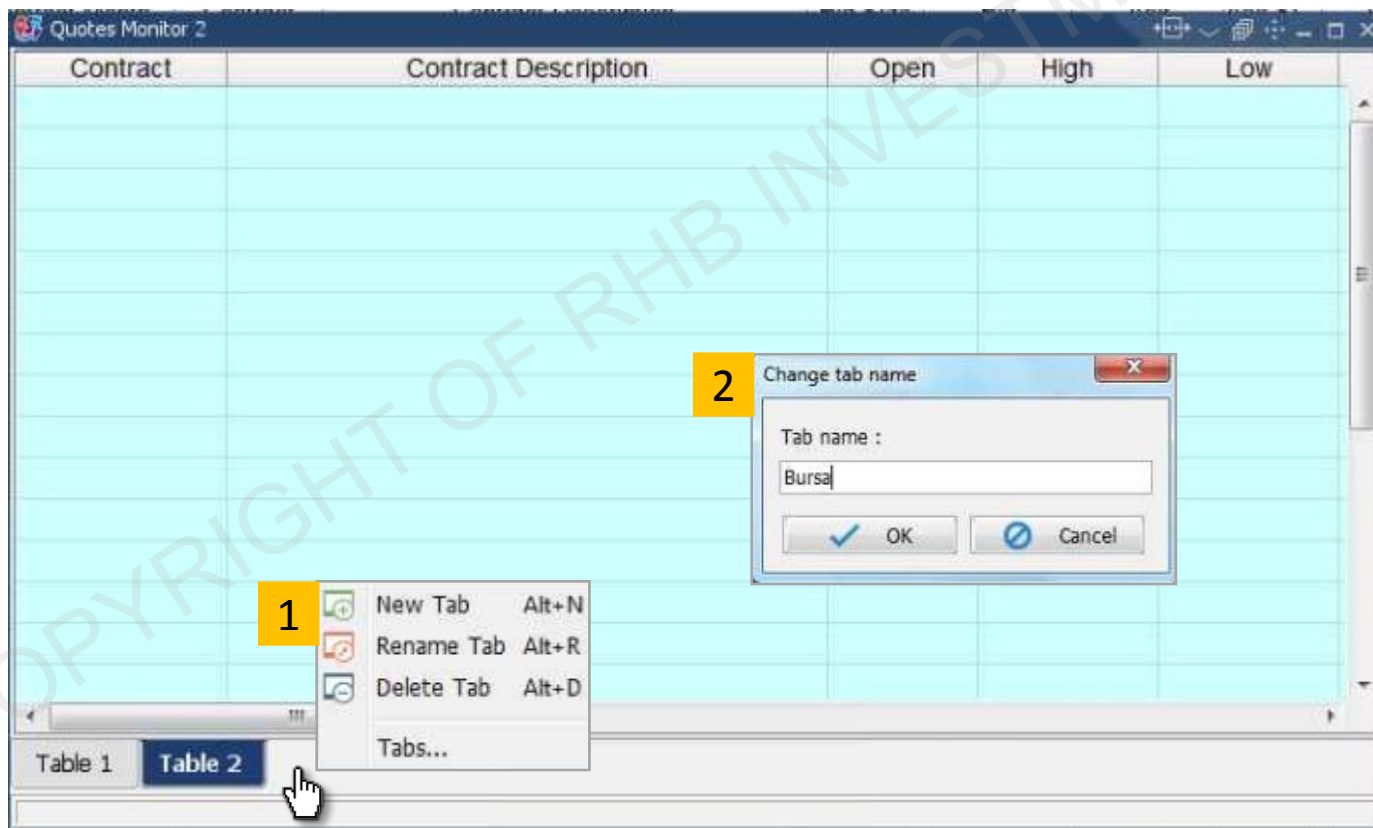

2.6 Overview — Help Button

- When you want to clarify on certain functions, you can always click “Help” from toolbar function or press “Ctrl + H”.
- The “Help” instruction will show for current active workplace only, the below example is showing the help instruction for Quotes Monitor

3.0 Quotes monitor – Create Multiple Quotes Tabs

- 1 To create new tab for price quotes, right click the bottom of “Quotes Monitors”, click “New Tab”.
- 2 Right click the tab to “Rename Tab”.

3.1 QST – Adding Futures Contract

- A simple way to add contract in RHB Futures QST is to key in the code as follows:
(Product Code) + (Number of the nearest contract month) + (-)
- For example on 1 December 2018:
 - ❑ **MPC1-** will become FCPO December 2018
 - ❑ **MPC2-** will become FCPO January 2019
 - ❑ **MPC3-** will become FCPO February 2019
 - ❑ **MPC2-:3-** will become FCPO Dec18Jan19 Spread
 - ❑ **MPC2-:3-:4-** will become FCPO Dec18Jan19Feb19 Butterfly
- The quotes will automatically switch the contract to following month after the spot month contract is expired.

Future Product	QST Product Code
Bursa Palm Oil Futures	MPC
KLCI Futures	KLI
Comex Gold	EGC
E-mini S&P 500	ES
E-mini Dow Jones	YM
WTI Crude Oil	ECL
E-mini Crude Oil	QM
Soybean	ZS
Soybean Oil	ZL

3.2 Adding Quotes – Using Product Dropdown List

- On “Contract” cell, type “product code” or product key words and a dropdown list will appear.

ZCH14	
ZCZ14	
6EZ13	

Working Order, Current Open Position, contract open P/L

Pressure

The **Pressure** bar represents a relation between the open price, the low, high and last price. It starts with the lower value from the left and in ends with the higher value in the right. The line that separates the two colors represents the last price relative to the low and high prices and the little black arrow below represents the open price.

In order to change the colors that are used for the Pressure bar, please go to the [Look](#) tab of the [Quotes Monitor Properties](#) dialog.

Tick

Tick is the evolution of the current trading session displayed as a trade-to-trade variation with pluses and minuses (or equal signs) based on the up or down trend of the market.

Starting with version v1.2.5 the pluses, minuses and equal signs are substituted with colors (please go to the [Look](#) tab of the [Quotes Monitor Properties](#) dialog, in order to change the colors):

-  the color of **NC positive** for pluses
-  the color of **NC negative** for minuses
-  the color of the text for equal

In order to change the way this column is shown, please go to the [Advanced](#) tab of the [Quotes Monitor Properties](#) dialog.

4.0 Charts - Overview

- Open Chart by selecting  from desktop shortcuts bar.

4.1 Charts – Change Product

- To change product, type your preferred product on the chart screen, and new chart selection window will appear.

4.2 Charts – Chart Tools 1

- Right click on the chart screen to open chart properties.

The screenshot shows a trading chart interface with three context menus open, illustrating the steps to switch to a continuation chart.

- Drawing Tools:** A list of drawing tools including Trend Line, Channel, Fibonacci Retracement, Fibonacci Levels, Fibonacci Extensions, Support/Resistance Line, P&L Calculator, Label, Pointer, Andrew's Pitchfork, Ellipse, Fibonacci Fan, Fibonacci Arc, Cyclic Arc, Cyclic Levelled Arcs, Gann Fan, Gann Retracement, Rectangle, Speed Resistance, Speed Resistance Arc, Toggle Drawing Tools Pad (Alt+A), Erase, and Erase All.
- Chart Type:** A list of chart types including Line, Area, Bars, and Candles (selected).
- Chart Timeframe:** A list of timeframes including Ticks, Volume, Price Change, Price Range, Intraday, Daily, Weekly, Monthly, and Quarterly.

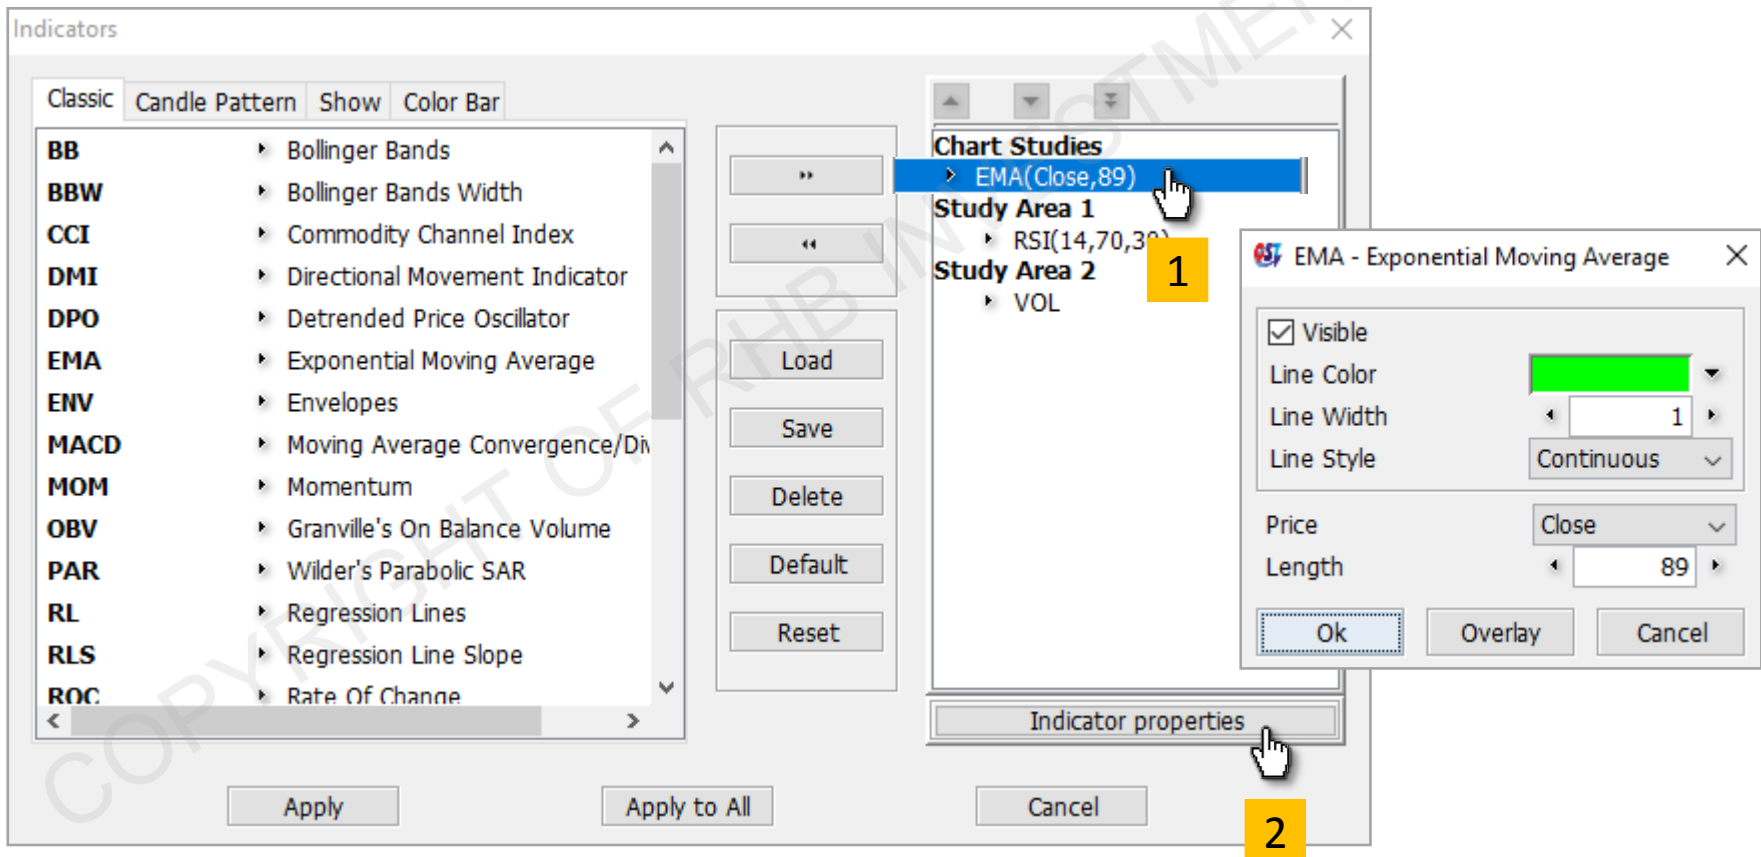

A yellow box labeled "Switch to Continuation Chart" points to the "Continuation" option in the Chart Type menu. A second yellow box labeled "Switch to Continuation Chart" points to the "By Front Month" option in the Chart Timeframe menu.

4.2 Charts – Chart Tools 2

4.3 Chart – Technical Indicators

- Type “Alt + I” to add and edit “Indicators” or open from chart tools.
- Select indicators from the list and click  to add indicators into chart. Do the opposite to exclude indicators from the chart.
- To change “Indicator Properties”, follow the step below.
- To Save template, Click  button and “Save Template” dialog will appear.

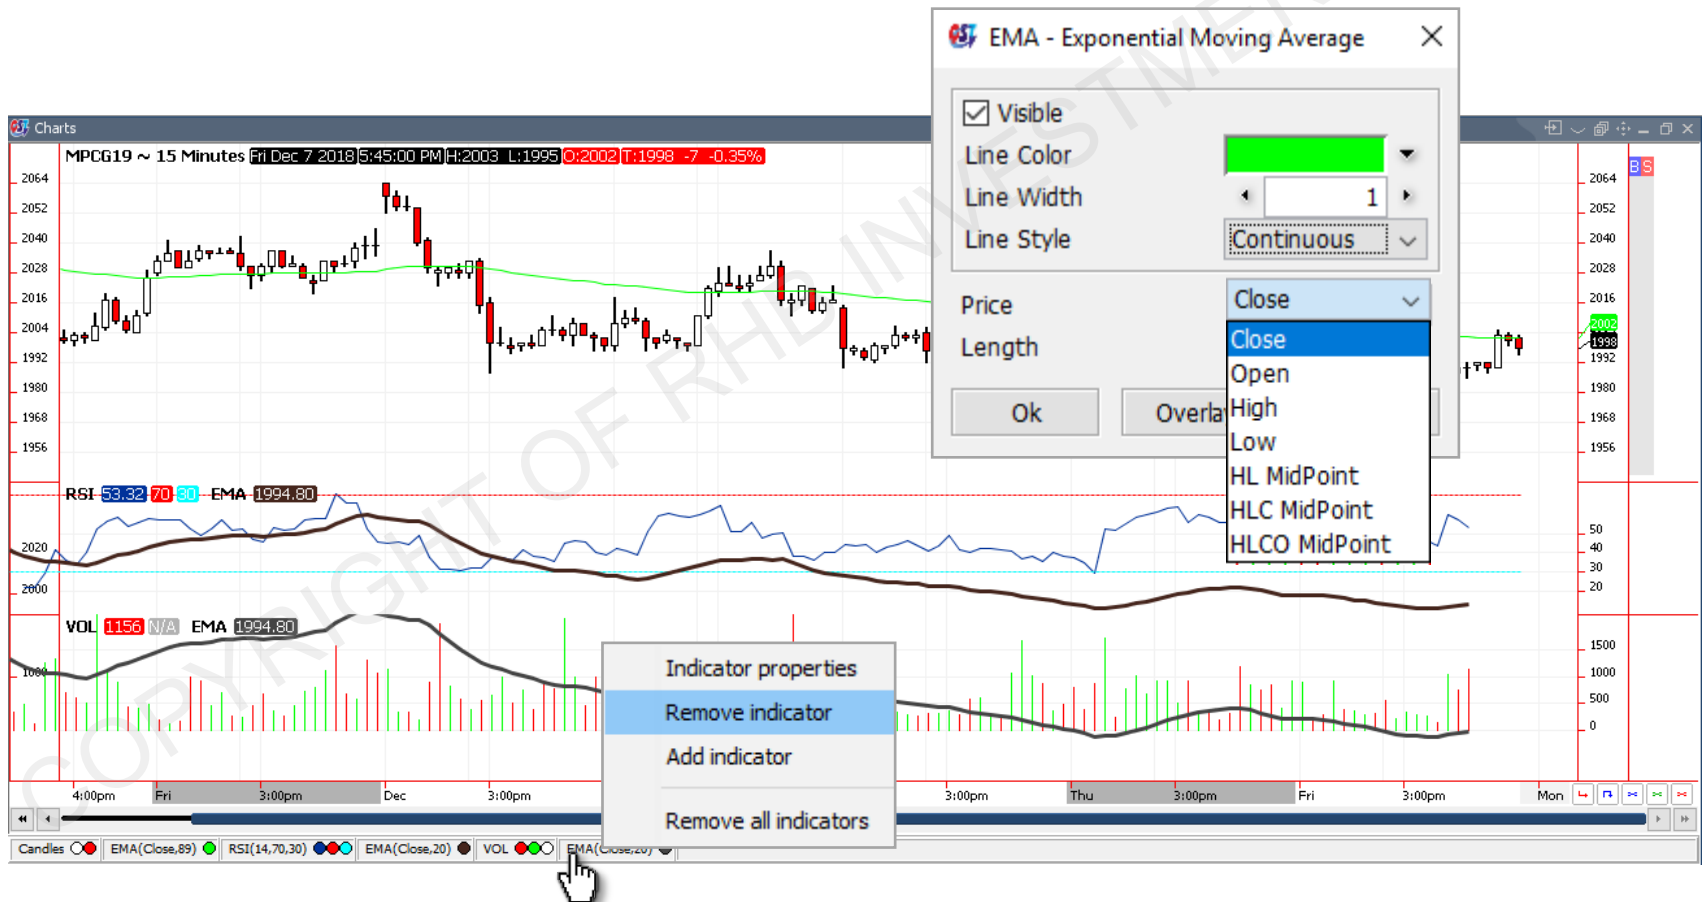

4.4 Chart – Add Studies into Indicators

- User can add studies into existing technical indicators to create further analysis.
- Below are two examples plotting an exponential moving average on RSI and Volume to determine 20 bars changes on market momentum and activities.
- Please note that Y axis scaling may vary from primary indicators. To make changes, please right click and adjust accordingly.

4.5 Chart – Remove or Edit Indicators

- To remove indicator, Right Click the indicators bar at the bottom of charts frame and select “Remove Indicator”
- To edit Indicator, Right Click the particular indicator and select “Indicator Properties”.

5.0 Place Order in RHB Futures QST

Click on Last / Bid / Ask Price, a **LEFT click** on any of the mentioned prices will place a **BUY** order and a **RIGHT click** will place a **SELL** order.

5.1 Place Order – Order Preview

- 1 On the Product quote, **Left click** Last/Ask/Bid price to open “**Buy Order Preview**” or trade ticket.
Right click Last/Ask/Bid price to perform “**Sell Order Preview**”.
- 2 Enter preferred “Quantity”, “Price” to place order.
- 3 By default, the Order Preview will be showing “Limit” and lifetime as “Day” order. Click dropdown menu to make changes.
- 4 Click  to Submit order or double tap “Enter”.

Contract	Bid Size	Bid	Ask	Ask Size	Last

5.5 Price Ladder – Placing Order

- On the price ladder, on preferred price **Left click** Price/Bid Size/Ask Size to open “**Buy Order Preview**” or trade ticket. **Right click** Price/Bid Size/Ask Size to open “**Sell Order Preview**”.
- Order preview ticket will appear, follow slides on preview order for more info.

5.5 Price Ladder – Amend & Cancel Order

- 1 Right click the working order and click “Cancel” to cancel working order.
- 2 “Cancel/Replace” allows user to replace order using “Order Preview”.
- 3 “Cancel/Replace Market” allows user to cancel existing order and replace with market order

The screenshot displays the RHB Price Ladder interface with three numbered callouts illustrating the process to cancel or replace an order.

Callout 1: A "Cancel Order" dialog box is shown, asking "Are you sure you want to cancel order #20878 ? #20878: Sell 1 KLIZ18 @1684.00". The "Yes" button is highlighted.

Callout 2: A "CANCEL/REPLACE ORDER PREVIEW" window is shown. It displays the order details: Account Number: 80010, Name: RHB QBO DEMO, Order #20878: Sell 1 KLIZ18 @1684.00. The "Edit" section shows the order type as "LIMIT" and the quantity as "1". The "Contingency" section is empty.

Callout 3: A "Cancel/Replace to the Market" dialog box is shown, asking "What orders do you want to cancel/replace to the market?". The order #20878: Sell 1 KLIZ18 @1684.00 is listed with a checked checkbox.

The background shows the Price Ladder for KLIZ18, with a right-click context menu open over the order #20878: Sell 1 KLIZ18 @1684.00. The menu options include: Cancel, Cancel / Replace, Cancel / Replace Market, Park Order, Contingency, Place Buy Order, Place Sell Order, Add Alarm, and Price Ladder.

5.5 Place Order – Price Ladder Settings

- User can customize own preference to use the price ladder. Open Price Ladder Properties to do the settings.

9.0 Mobile Data

- Mobile Data tab allows user to customize price quotes and synchronize Web and mobile apps quotes page layout.

10.0 Other Widgets - Add Alarms

- Alarms notify the user when a certain price limit is reached.
- There are 3 types of alarms:
 - ☐ Price Alarms: If the last price of selected contract has reached the described condition
 - ☐ Volume Alarms: If the volume traded of selected contract has reached described condition
 - ☐ Trade Size Alarms: If the trade size has reached the described condition
- A notification pop-up window will appear every time an alarm is invoked if “Enable all boxes” option is selected.

The screenshot shows the 'New Alarm' dialog box with the following fields and options:

- Message :** Price Greather than 2000
- Alarm Type:** ☒ Price Alarm, ☐ Volume Alarm, ☐ Trade size alarm, ☐ Time Alarm
- Contract:** MPCF19

10.2 Other Widgets – Data Suite

- Open Data Suite Widget  from “Desktop Shortcut Bars” to view specific futures contract all months info.

10.3 Other Widgets – Change Contract Month

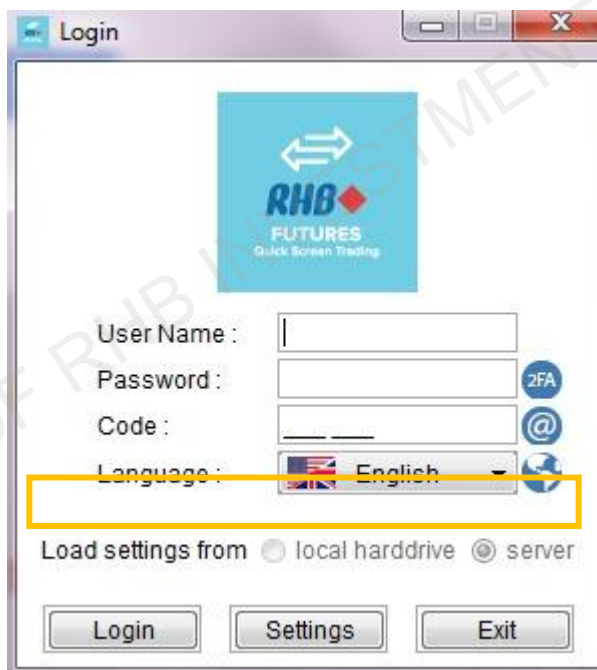

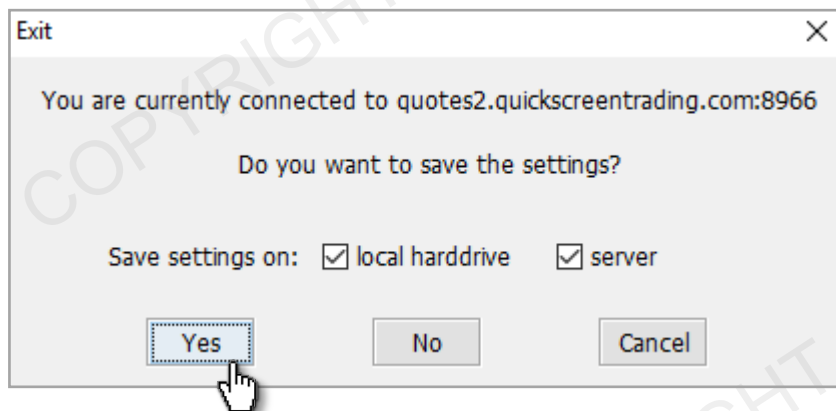

- Open Data Suite Widget  from “Desktop Shortcut Bars” to change contract month from old month and old year to new month and new year from drop down menu.

A screenshot of a 'Change Contract Month' dialog box. The dialog has a title bar with a close button (X). Inside, there is a 'Symbol' dropdown menu showing 'M'. To the right, there are two rows of dropdown menus. The first row is labeled 'Old month:' with a value of 'F' and 'Old year:' with a value of '18'. The second row is labeled 'New Month:' with a value of 'G' and 'New Year:' with a value of '19'. At the bottom, there are two buttons: 'Ok' with a blue checkmark icon and 'Cancel' with a blue circle and slash icon. A large, diagonal watermark reading 'COPYRIGHT OF RHB INVESTMENT BANK' is visible across the dialog box.

11.0 Save Settings & Logout

- When you want to close the application, user can select “Exit” from the top right corner or click “Logout” from the toolbar menu.
- User will be asked to save the current settings.
- User is recommended to save settings on both “local hard drive” and ”server” all the time.
- By doing this, user is able to load back previous saved settings and continue to work from there. If you accidentally deleted your setting or reinstalled the system on another PC, you can load back the previous same setting.

On the login screen, select “Load settings from server” before log in
